PROFESSIONAL SUMMARY

AI Engineering undergraduate expected to graduate in 2027, with hands-on personal-project experience in AI workflow automation and web development. Built an n8n workflow that collects AI news from RSS feeds, summarizes updates with Google Gemini, and delivers text and audio digests through Telegram. Also designed and developed a website for a Yemeni restaurant in the Netherlands. Interested in entry-level AI engineering and AI automation opportunities.

TECHNICAL SKILLS

Programming: Python, PHP

Frameworks & Tools: Laravel, Filament, Next.js, Flask, n8n

AI Platforms & APIs: Google Gemini, OpenAI API, Claude, DeepSeek

Databases: MySQL, MongoDB, SQLite, Microsoft SQL Server

PROJECTS & PRACTICAL EXPERIENCE

AI News Automation Workflow — NewsAI
Personal project | GitHub repository

Built an n8n workflow that collects AI news from RSS feeds, filters recent updates, summarizes them in Arabic using Google Gemini, and sends text and audio digests to Telegram.

Restaurant Website — Jemenitische Keuken
Freelance / independent project | Live website | GitHub repository

Designed and developed a website for a Yemeni restaurant in the Netherlands. The website is reported by the developer as completed.
